UMaine Engineering Co-op Program

For Sophomore Chemical Engineers, offers should be for one of these of two-semester rotations:

Summer 2024 AND Spring 2025

OR

Fall 2024 AND Summer 2025

Here’s what the coverage looks like – a full time co-op from beginning of Summer 2024 through the end of Summer 2025:

| | |
|-----------------------|-----|
| Summer 2024 (May-Aug) | Joe |
| Fall 2024 (Aug-Dec) | Sue |
| Spring 2025 (Jan-May) | Joe |
| Summer 2025 (May-Aug) | Sue |

Most companies will hire two CHE co-ops to provide this year-round coverage. *CHE students are also able to work two summers but most will opt for the above rotation.*

For All Other Sophomores (Mechanical, Electrical/Computer, Civil, etc.), offers should be for two summer semesters:

Summer 2024 AND Summer 2025

For First Year and Juniors (any major), offers should be for one summer semester:

Summer 2024

Co-op decision day is November 2nd this year. Offers should be extended in writing to the students well before this date. All students will accept the offer they choose on 11/2/23. For students with multiple offers we ask them to decline the one(s) they do not wish to accept so that companies can make offers to other classmates before the November 2nd deadline.

Seniors (full time positions) can accept at any time.

Please feel free to contact Jen and I with any questions.

-Carrie
