UMainePPF.org

UMaine Engineering Co-op Program

For Sophomore Chemical Engineers, offers should be for one of these of two-semester rotations:

Summer 2025 AND Spring 2026

OR

Fall 2025 AND Summer 2026

Here's what the coverage looks like – a full time co-op from beginning of Summer 2025 through the end of Summer 2026:

| | |
|-----------------------|-----|
| Summer 2025 (May-Aug) | Joe |
| Fall 2025 (Sep-Dec) | Sue |
| Spring 2026 (Jan-Apr) | Joe |
| Summer 2026 (May-Aug) | Sue |

Most companies will hire two CHE co-ops to provide year-round coverage.

For All Other Sophomores (Mechanical, Electrical/Computer, Civil, etc.), offers should be for two summer semesters:

Summer 2025 AND Summer 2026

For First Year and Juniors (any major), offers should be for one summer semester:

Summer 2025

Co-op decision day is October 30th this year. Offers should be extended in writing to the students well before this date. All students will accept the offer they choose on 10/30/24. For students with multiple offers we ask them to decline the one(s) they do not wish to accept so that companies can make offers to other classmates before the October 30th deadline.

Seniors (full time positions) can accept at any time.

Please feel free to contact us with any questions.
