

**The Chip Moody Consider Engineering Program has inspired more than 3,500 students over the past 40+ years.**

Here's what people are saying about it...

"The Consider Engineering program gives you an opportunity to experience what it would be like to be an engineering student. From lectures and labs to life in the dorms you'll get a real taste for college life. Students walk away knowing if engineering is the right college major for them."

**DR. DAVID NEIVANDT**

*Professor of Chemical & Biomedical Engineering;  
Director of Graduate School of Biomedical,  
Science and Engineering*

"Like many students in this phase from high school to college, my son has felt the overwhelm of deciding on a future that feels like a good fit. [After Consider Engineering,] he was, for the first time, confident that he wanted to pursue engineering. As a parent, I can't effectively put into words how moving it is to witness that shift!"

*Mom of a 2025 Consider Engineering Participant*

"The experience has helped me to figure out I want to be a mechanical engineer and go to UMaine. I especially liked watching the engineers who we saw at the mill who get to problem solve and work on the equipment. It sold me on becoming a mechanical engineer."

*2025 Consider Engineering Participant*

# What is Consider Engineering?

The Chip Moody Consider Engineering Program is a four-day summer experience designed for high school juniors to explore what it takes to be both an engineer and a college student.

You'll participate in individual and team-based problem-solving challenges, exciting hands-on engineering experiments, and network with industry professionals, practicing engineers, current UMaine students, and fellow participants from across the country.

You'll stay in the residence halls at the University of Maine in Orono. **All accommodations and meals are covered by the University of Maine Pulp + Paper Foundation.** There's no cost to attend.

This immersive experience will help you expand your academic potential, explore career options, and, most importantly, start answering that big question:

## What do I want to do with my future?

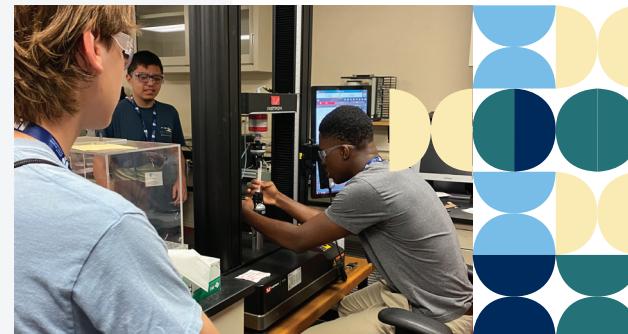

"Consider Engineering participants will build lasting lifetime friendships as their eyes are opened to the many possibilities that engineering has to offer. These four days on campus will shape advanced education and career choices for years to come."

**CARRIE ENOS, PRESIDENT**  
UMaine Pulp + Paper Foundation

## Stay during the summer, be inspired for life.

- Form lifelong friendships
- Experience campus life
- Explore what it takes to be an engineer
- Meet industry leaders
- Work hands-on and in the field
- Discover if engineering is right for you

**Experience college life and explore what it takes to be an engineer with bright and enthusiastic high school juniors from Maine and around the U.S.—just like you.**

## Who can apply?

Admission for this free-of-charge program is competitive. We look for students who:

- Have completed at least three years of college-prep-level mathematics and science by junior year
- Participate in extracurricular and/or community activities
- Demonstrate strong communication and leadership skills

**Only 132 students are selected each summer.**  
Don't miss your chance.

## Apply for Consider Engineering today!

Applications for the Consider Engineering Program will be accepted starting January 15.

All application materials must be received by April 15. Admission decisions will be announced via the email provided in the application on or before May 31.

## How to apply

Please visit our website at [UMainePPF.org](http://UMainePPF.org) and click on the Programs + Events tab at the top and then select the Consider Engineering page.

There you can apply electronically by filling out the form and attaching the following documents:

- A one-page letter indicating what benefits you intend to achieve through participation in the program
- Your complete high school transcript (freshman year through mid-junior year)
- A one-page list of extracurricular activities, honors, and leadership positions
- A letter of recommendation from a teacher or counselor

Want a summer experience that could change your life? What are you waiting for? **Apply today!**
