UMaine Engineering Co-op Program

For Sophomore Chemical Engineers, offers should be for one of these of two-semester rotations:

Summer 2027 AND Spring 2028

OR

Fall 2027 AND Summer 2028

Here's what the coverage looks like – a co-op student from the beginning of Summer 2028 through the end of Summer 2028:

Summer 2027 (May-Aug)	Joe
Fall 2027 (Sep-Dec)	Sue
Spring 2028 (Jan-Apr)	Joe
Summer 2028 (May-Aug)	Sue

Most companies will hire two CHE co-ops to provide year-round coverage.

For All Other Sophomores (Mechanical, Electrical/Computer, Civil, etc.), offers should be for two summer semesters:

Summer 2027 AND Summer 2028

For First Year and Juniors (any major), offers should be for one summer semester:

Summer 2028

Co-op decision day is October 29th this year. Offers should be extended in writing to the students well before this date. All students will accept the offer they choose on 10/29/2026. For students with multiple offers we ask them to decline the one(s) they do not wish to accept so that companies can make offers to other classmates before the October 29th deadline.

Seniors (full time positions) can accept at any time.

Please feel free to contact us with any questions.
