Who is the Pulp + Paper Foundation?

The University of Maine Pulp and Paper Foundation supports aspiring engineers studying at the University of Maine who are interested in pursuing careers in the paper industry.

How Pulp + Paper Foundation helps

One of the ways we support students is by providing full or partial tuition scholarships to aspiring chemical, civil, computer, electrical and mechanical engineering students enrolled at the University of Maine who are interested in pursuing careers in the booming paper industry.

Why the pulp and paper industry?

The pulp and paper industry needs energetic, bright people to help solve challenging business and technical problems and to provide innovative ideas for future success. The current demand for technically trained engineers far exceeds the supply.

100% Placement

100% of Pulp and Paper Foundation Senior Scholarship recipients are either employed or attending graduate school (by choice).

UMainePPF.org

Who can apply for a scholarship from the Foundation?

- **High school seniors** who will attend the University of Maine engineering program
- **Current first-year, upper-class, and transfer students** enrolled in an engineering degree program at the University of Maine

We look for motivated students with excellent grades as well as communication and leadership skills.

Merit-based scholarship requirements

Scholarship recipients must achieve a minimum cumulative 3.0 GPA and demonstrate a continued interest and commitment in pursuing a career in the pulp and paper industry by participating in:

- Chinn Management Seminars
- Student Organization membership
- Co-op job or internships after the sophomore year of study

Additional details are available when scholarship is awarded. Scholarships are renewed annually based on a student's ability to meet the above goals.
